

E400

Product information "Flush-mounted double sockets for opposite installation in partition walls"

- The flush-mounted partition wall socket DUPLEX is the solution for opposite installation of flush-mounted sockets in thin partition walls from 100 mm. With double design in a connected socket, fitting a combination of opposite sockets can be done in just one step. An opposite flush-mounted socket is no longer pushed out.
- Suitable for partition walls from 100 mm
- Easy to install
- Space-saving
- More wiring space
- Pipe and cable inlets
- Can be supplemented with moveable flange

- Installation in one step, without the need to work on both sides
